Objective

Passionate and motivated software and web developer seeking a junior developer position to apply and enhance skills in React, React Native, JavaScript, and full-stack development. Eager to contribute to innovative projects while continuing to grow as a software professional.

Skills & Abilities

Programming Languages
Proficient in JavaScript, React, React Native, HTML, CSS, PHP, with hands-on project experience. Some experience with Java.

Web development
Familiar with modern web development best practices, including responsive design, cross-browser compatibility, and performance optimization.

Software development
Experience applying software development principles to create intuitive, user-focused applications with React and React Native.

UI/UX Concepts
Junior-level understanding of design principles and user experience, with a focus on enhancing usability.

Databases
Entry-level experience with SQL and relational databases.

Communication

Strong verbal and written communication skills, with the ability to clearly convey technical concepts to diverse audiences.

Education

North Island College - Comox, BC

Web and Mobile Application Diploma

Completed coursework includes software development, web development, mobile app development, and database management.

AWARDS

Achieved 'Dean's Honor Roll' recognition for outstanding academic performance every year of completed schooling.
